

## How to install PEDAT app from Docker hub:

**Step 1:** Install Docker Desktop based on your operating system from the following source:  
[Docker Desktop: The #1 Containerization Tool for Developers | Docker](#)

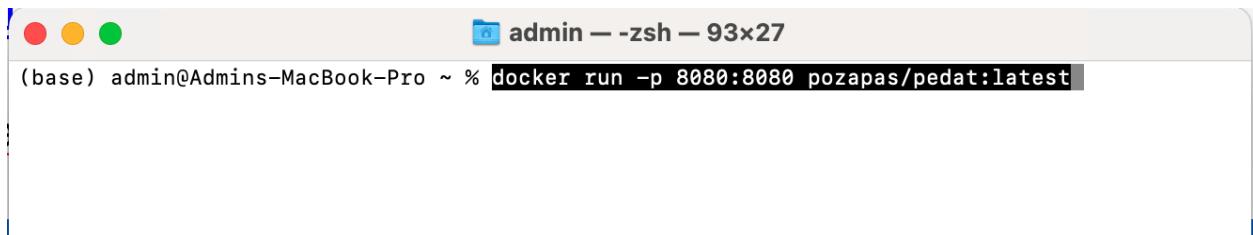

**Step 2:** Search for 'pozapas/pedat' using the search toolbar.

**Step 3:** Pull the 'pedat' Docker image.

**Step 4:** Use the command line and type: 'docker run -p 8080:8080 pozapas/pedat:latest'.

**Step 5:** Type "<http://localhost:8080>" into your browser.
